

Computer Forensics

Recover your data and identify causes and responsible

We apply specialized scientific and analytical techniques that will allow you to identify, preserve, analyze and present data that is valid within a legal process. We have a team with extensive experience in different jurisdictions.

Knowing the modus operandi may not only discover the origin of the irruption, but also may establish the necessary policies so that a fact of similar characteristics does not happen again.

Forensic analysis is the ideal solution for companies that have the need to investigate computer security incidents. It allows taking the appropriate measures so that the event does not happen again, apart from knowing in depth the details of it.

Advantages

- > Recover hijacked information
- > Discover exploited vulnerabilities
- > Identify attack leaders
- > Establish measures to prevent a recurrence
- > Present the evidence within a legal process

Other Services

- > Red Team
- > Penetration Testing
- > Vulnerability Assessment
- > Social Engineering

About Us

Securetia is made up of a team with a proven track record in Cybersecurity. Our experts have more than 10 years working in the field, performing tasks such as Penetration Testing, Source Code Audits, Computer Forensics, Incident Response, Consulting and Implementation of Security Technologies.

We focus our efforts on helping organizations improve their security so that cyber-attackers can not break their barriers and their information can be protected.
