

Penetration Testing

Discover to which attack vectors your company is exposed

Our Penetration Test service is designed to verify which attack vectors a cybercriminal could use to breach your infrastructure.

We follow a methodology based on the best practices of the market and we use the same tools that real attackers use.

The service can be customized to test external or internal attacks, simulating different real-life situations.

You will receive detailed reports of how vulnerabilities have been exploited and recommendations about how to mitigate them.

Advantages

- > Know your level of exposure to attacks
- > Check your detection and defense capabilities
- > Identify and mitigate vulnerabilities
- > Service adaptable to your needs
- > Complete reports with clear recommendations

Other Services

- > Red Team
- > Cyber Intelligence
- > Social Engineering
- > Computer Forensics

About Us

Securetia is made up of a team with a proven track record in Cybersecurity. Our experts have more than 10 years working in the field, performing tasks such as Penetration Testing, Source Code Audits, Computer Forensics, Incident Response, Consulting and Implementation of Security Technologies.

We focus our efforts on helping organizations improve their security so that cyber-attackers can not break their barriers and their information can be protected.
