

# Vulnerability Assessment

## Find your vulnerabilities before cybercriminals do

Our Vulnerability Assessment service allows you to detect the security problems in your infrastructure, which could be used by an attacker to take control of it.

Automated tools are used that verify a large number of aspects in their systems in order to detect failures.

If a vulnerability is easy to find by an automated system, the attackers will also find it, therefore, it is recommended to adjust the defenses as a priority.

You will receive detailed reports and recommendations on how to solve each problem encountered.

## Advantages

- > Detect weak points in your infrastructure
- > Improve the level of security in your organization
- > Mitigate your vulnerabilities effectively
- > Have an orderly and prioritized action plan
- > Obtain reports with clear recommendations

## Other Services

- > Red Team
- > Penetration Testing
- > Social Engineering
- > Computer Forensics

## About Us

Securetia is made up of a team with a proven track record in Cybersecurity. Our experts have more than 10 years working in the field, performing tasks such as Penetration Testing, Source Code Audits, Computer Forensics, Incident Response, Consulting and Implementation of Security Technologies.

We focus our efforts on helping organizations improve their security so that cyber-attackers can not break their barriers and their information can be protected.
